Guidelines for Lecture notes

1. Lecture notes for week x should be submitted to TA and me on or before the end of week x+6, where x belongs to {3, 4, 5, 6, 7, 8, 9}.

2. Do not copy and paste. Once I find any cheating, zero will be given for this part.

3. Understand the slides and readings, write the lecture notes in your own language and logic

4. Try to make the notes self-contained

5. An example for lecture 2 is available at https://haiyangxc.github.io/hyxue/teaching/Lecture2.pdf

6. A latex template for lecture notes is available at https://haiyangxc.github.io/hyxue/teaching/template.zip However, you can use your own template.
